Dual boot Ubuntu and Windows

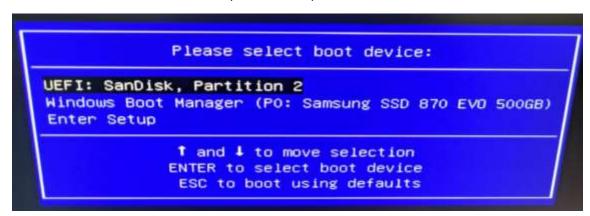

1. Plug the USB drive to a USB port and power-on the system

2. As soon as the power button is pressed go on pressing F9 key (on some systems it will be F12 key. Eg. Acer, F9 for HP – find what is the key for your system). Press the Boot Menu Key (F9/F12) three or four times until the boot menu is displayed.

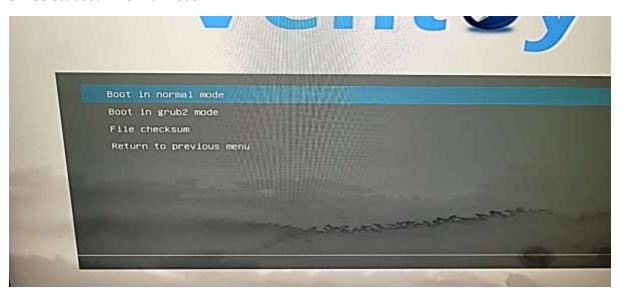

3. Select the USB drive as the boot partition and press enter.

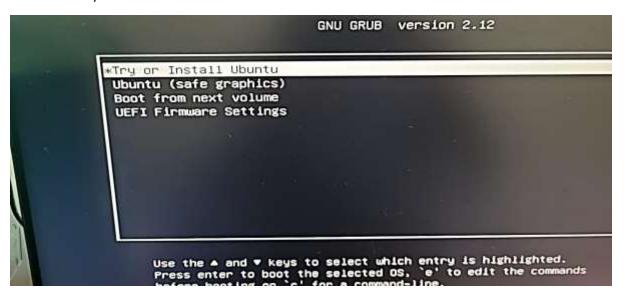

4. Select the Ubuntu Boot Image and press enter.

5. Select boot in normal mode

6. Select *Try or install Ubuntu

Select your keyboard layout Detect
